

14.661 Labor Economics I

Staff:

Instructors: Parag Pathak, E17-240, ppathak@mit.edu; Daron Acemoglu, E18-269D, daron@mit.edu
Teaching fellow: Yusuke Narita, narita@mit.edu

Logistics:

Two lectures per week on Tuesday and Thursday from 10:30-12pm in E51-385

Pathak begins on 9/4/2014 and ends 10/16/2014

Acemoglu begins on 10/21/2014 and ends 12/9/2014

Description:

This is a graduate course in labor economics, appropriate for PhD students in the Department of Economics and other students with permission of the instructor. Pathak and Acemoglu split the fall semester. In the spring, Professors David Autor and Heidi Williams teach Labor Economics II.

The aim is to acquaint students with traditional topics and to encourage the development of independent research interests. The syllabus contains readings of two sorts. The first will be emphasized in lectures. Other readings may be discussed briefly, but are also listed as a guide to the literature.

Students who are interested in pursuing research in labor economics are *strongly* encouraged to attend the weekly Labor Economics student workshop, which meets on Tuesdays from 12:00-1:00pm, the joint MIT Labor/Public Finance seminar in the Fall on Mondays from 4-5:30pm, and the Econ-Sloan Applied Microeconomics seminar which meets in the Spring.

A Stellar website has readings, assignments, and recitation material.

Course Materials:

Working labor economists should have easy access to the following resources:

- Ashenfelter, Orley and David Card (2010): Handbook of Labor Economics, Volumes 4A and 4B.
- Angrist, Joshua and Jorn-Steffen Pischke (2009): Mostly Harmless Econometrics: An Empiricist's Companion, Princeton University Press.
- Deaton, Angus and John Muelbauer (1980): Economics and Consumer Behavior, Cambridge University Press.
- Borjas, George (2010): Labor Economics, 5th Edition, McGraw Hill-Irwin.

Grading and Requirements:

Your grade in this course depends on three parts: final exam in December covering material from both quarters (50%), 5-6 problem sets (25%), and an empirical project (25%) involving replication and extension of published work.
